

Orchestra dei braccianti

It's a project that wants to fight the caporalato with the weapon of music, bringing together musicians, agricultural workers and immigrants

The "Orchestra dei braccianti" is a project created by Terra! Onlus Association, which in these years have carried out research and campaigns on the themes of food supply chains, to denounce the causes of exploitation in the fields and the unsustainability of an industry that too often produces poverty, segregation and inequality. With the "Orchestra dei braccianti" they want to give voice to people who suffer the social impacts of an unfair system, who live in the ghettos and who fight for the rights of land workers. The Orchestra dei braccianti, supported by the Intesa Sanpaolo Charity Fund, is part of the "Voci Migranti" project, funded by the Italian Development Cooperation Agency. The launch event has obtained the partnership of the Municipality of Cerignola and Flai-Cgil.
